

**PhD Position
Genetics and Evolutionary Biology
Johannes Kepler University**

The laboratory of Dr. Tiemann-Boege at the department of Biophysics at the Johannes Kepler University, Linz is seeking to recruit new PhD students. Applications from young scientists interested in working with next generation technologies and new methods for DNA analysis are particularly welcomed.

The work will complement the ongoing research of Dr. Tiemann-Boege in single molecule genetics focused in understanding the molecular evolution of the human genome driven by processes like mutation and recombination. The specific projects at hand are to study the mutagenic effects of meiotic recombination and the role of epigenetic modifications in the activity of recombination hotspots.

Applications should include a CV, a summary of scientific goals and contact information of two references. Applications should be sent before July 1st to Dr Tiemann Boege -JKU, Altenbergerstr. 69, A-4040 Linz - by email: Irene.Tiemann@jku.at. The successful candidate should be appointed before August 1st 2010 and the dead line for start of the project is September 1st 2010. Funding is for 2+2 years and the salary will be as established by the [FWF](#) for doctoral students.
